The Perfect Knowledge Management Solution?

(a group discussion)

How can we develop our systems to create an effective knowledge sharing culture?

What makes people trust the validity of our knowledgebase?

Can data be easily transferred to different systems?
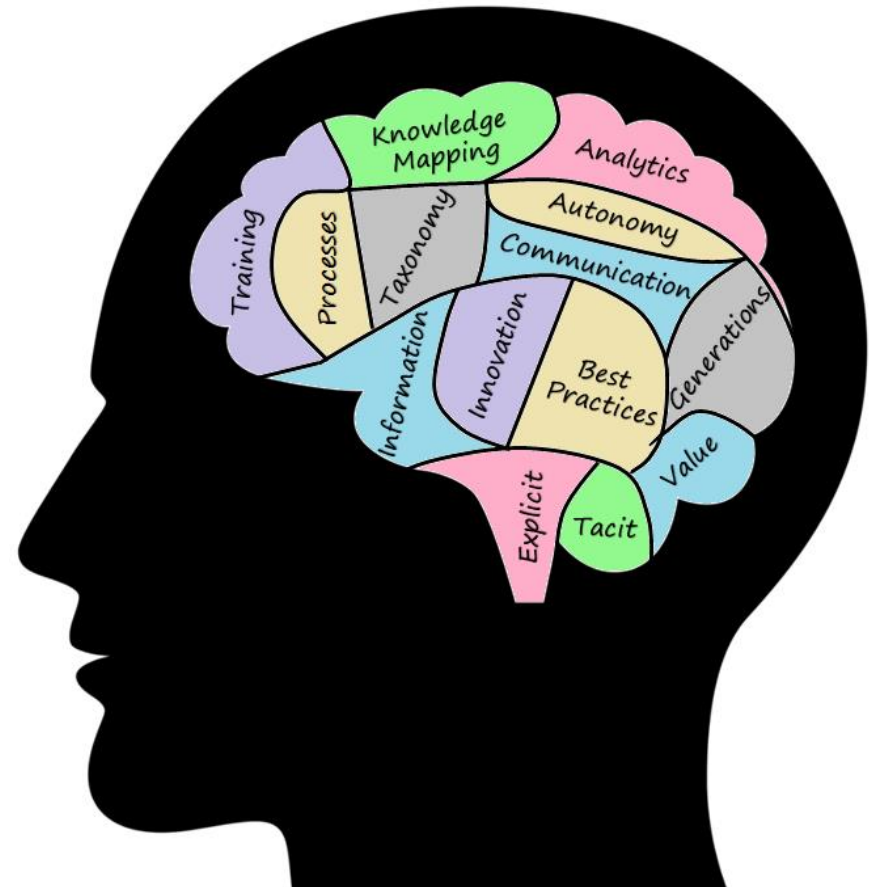

Are there knowledge gaps?

How is the data retrieved?

User-friendly interfaces?

Reduce duplication?

Easily accessible, but secure?

Use of analytics and queries?

Goals:

1. Spark new ideas to bring back to your organization

2. Identify common problems and how we can solve them together
